

YOUNGWOOT

Youngwoo Telecom corp. established in July of 1995, has been growing continuously from a pager in our early stage of business to telecommunication equipment area like mobile receiver etc and also leading the wireless network system market based on WCDMA(HSDPA), (Wi-Bro).

In addition, we try to export other countries by constructing overseas corporation and we are also admitted our technology and quality from the world market so we expect that amount of orders gradually expand for constructing overseas wireless communication infrastructure.

All of Young woo members are doing self-development with our new resolution and mind as Next Generation Telecommunication leader under the controlling of sudden-change environment of IT industry. In addition, we put the steady investment, the development & improvement of technology and welfare improvement of employee for the promotion of fringe on our chief end.

We are putting out our best strength to contribute to 21C IT industry with our accumulated experience and technology by doing a creative management based on choice and concentration. Also we do our best to proceed to the credible enterprise through high-quality product and service to our client, mutual win-win strategy to cooperated company, constant profitability and growth to our investors.
